Profile

Results-driven Software Engineer specializing in Java Backend Development with extensive experience in designing and implementing scalable RESTful APIs. Proficient in Google Dialog Flow, Agile methodologies, and cloud-based solutions, with a track record of enhancing project outcomes through innovative problem-solving. Adept in Spring Boot, Angular, and data structures, delivering high-performance software tailored to client requirements. Demonstrated expertise in mentoring teams and optimizing software quality through comprehensive testing and debugging strategies.

Professional Experience

COGNIZANT TECHNOLOGY SOLUTIONS | SOFTWARE ENGINEER

AUG 2022 – PRESENT

- Designed and implemented RESTful APIs for seamless integration between systems.
- Leveraged Google Dialogflow to create dynamic dialog pages, conditions, and API endpoints.
- Participated in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives.
- Developed JIRA Dev User Stories and JUnit test cases to enhance software quality and reliability.
- Collaborated with cross-functional teams to gather requirements and design technical solutions.
- Mentored teammates to overcome technical challenges, fostering team growth and knowledge sharing.

COGNIZANT TECHNOLOGY SOLUTIONS | JAVA FULL STACK INTERN

FEB 2022 – JULY 2022

- Acquired in-depth training in Core Java, Spring Boot, and Angular technologies.
- Developed RESTful APIs for the final internship project, applying concepts of full-stack development

Education

MASTER OF COMPUTER APPLICATIONS (MCA), J C BOSE UNIVERSITY, YMCA FARIDABAD | 2020 – 2022

BACHELOR OF SCIENCE (HONS) IN COMPUTER SCIENCE, DYAL SINGH COLLEGE, UNIVERSITY OF DELHI | 2017 – 2020

Skills & Abilities

- Programming: Java, JUnit, Spring Boot, OOPs, Data Structures and Algorithms
- Tools & Platforms: Google Dialog Flow, MySQL
- Software Practices: Testing, Debugging, Agile Methodologies

Personal Projects

JOBIFY | Job Portal Application [Git Link](#)

- Developed a web-based job portal for recruiters and job seekers using Spring Boot and Thymeleaf.
- Implemented role-based access for recruiters and candidates to enhance security and functionality.
- Designed and deployed multiple RESTful APIs for login, job postings, and resume downloads.
- Utilized MySQL for database management.

BLOG APPLICATION | Blogging Platform [Git Link](#)

- Created a blogging platform allowing users to read, write, and search for blogs.
- Enabled guest users to register and add comments, with admin control for content moderation.
- Used MySQL for database storage and Thymeleaf for frontend template integration

Certifications

- Java Full Stack with Spring Boot and Angular [Link](#)
- Core Java [Link](#)
